Rating

5:15

- Green: this message is not spam
- Yellow: this message may be spam, will be tagged as spam and moved to your junk folder
- Red: This message is spam and will be rejected by the server

Default values: 5:15

The first value describes the "low spam score", the second represents the "high spam score".

Save changes

Whitelist

Whitelisted email addresses to **never** classify as spam. Wildcards maybe used.

Rule	Action
No data to display	
<input type="text" value="*@example.org"/>	<div>Add Item</div>

Blacklist

Blacklisted email addresses to **always** classify as spam and reject. Wildcards maybe used.

Rule	Action
No data to display	
<input type="text" value="*@example.org"/>	<div>Add Item</div>

Info

For global adjustments on your spam filter please check our section on [Rspamd](#).

For a domain wide black- and whitelist please check our guide on [Black / Whitelist](#)
