

# Manual configuration

These instructions are valid for unchanged port bindings only!

## Email

| Service | Encryption | Host             | Port |
|---------|------------|------------------|------|
| IMAP    | STARTTLS   | mailcow hostname | 143  |
| IMAPS   | SSL        | mailcow hostname | 993  |
| POP3    | STARTTLS   | mailcow hostname | 110  |
| POP3S   | SSL        | mailcow hostname | 995  |
| SMTP    | STARTTLS   | mailcow hostname | 587  |
| SMTPS   | SSL        | mailcow hostname | 465  |

Please use "plain" as authentication mechanisms. Contrary to the assumption no passwords will be transfered plain text, as no authentication is allowed to take place without TLS.

## Contacts and calendars

SOGos default calendar (CalDAV) and contacts (CardDAV) URLs:

1. **CalDAV** - <https://mail.example.com/SOGo/dav/user@example.com/Calendar/personal/>
2. **CardDAV** - <https://mail.example.com/SOGo/dav/user@example.com/Contacts/personal/>

Some applications may require you to use <https://mail.example.com/SOGo/dav/> or the full path to your calender, which can be found and copied from within SOGo.
